The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it does not identify the citizenship of each Inventor (the citizenship for inventors 2-4 is not defined).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 5-12, drawn to a polishing composition and method of using, classified in class 51, subclass 307.
- II. Claims 3-4, drawn to a roll off reducing agent, classified in class 252, subclass 79.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an additive to a polishing composition that **does not** require the specific viscosity as defined by the group I claims and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with John W. Bailey on 4/12/04, a provisional election was made with traverse to prosecute the invention of group I, claims 1-2 and 5-12. Claims 3-4 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John W. Bailey on 4/12/04.

The application has been amended as follows:

Cancel claims 3 and 4 in view of the above restriction.

Claim 5, lines 1-2, cancel "the roll-off reducing agent as defined in claim 3 or 4, an abrasive and water." and insert --a roll-off reducing agent which comprises a Brønsted acid or a salt thereof, an abrasive and water, wherein the composition has a specified viscosity of from 1.0 to 2.0 mPa•s at a shearing rate of 1500 s⁻¹ and 25°C.--.

Claim 11, lines 2-3 cancel "in the polishing step",

Art Unit: 1755

Claim 12, lines 2-3 cancel "in the polishing step".

The following is an examiner's statement of reasons for allowance:

The claimed invention is novel over the cited references because said references **fail** to teach or suggest the claimed composition and uses thereof, wherein the composition comprises the claimed specific components and has the claimed specific viscosity. As can be seen from throughout the specification, specifically on page 4, lines 5+ and the examples, criticality is shown for the claimed specified viscosity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
